# Skocik Chiropractic

Harrisburg

## Project Profile :

Dr. Albert (Al) Skocik relocated his practice in the fall of 2004. The new building required significant renovations. Environmental Interiors was selected to provide interior design (carpeting and interior finish selections), office furnishings and exam room furnishings, HIPPA compliance for records management, installation of products, and the relocation of existing rehabilitation equipment and office furnishings. The result was a fresh, exciting new space that looks wonderful and functions well for the staff and patients.
