

## Project Profile :

The new OIB building at Innovation Park was constructed to consolidate Penn State's Public Broadcasting, World Campus, and Continuing Education departments. Penn State and GBQC Architects chose Haworth products from Environmental Interiors based on the product design options, pricing, and ability of the Premise product to best interface with the clients raised floor-underfloor HVAC. The result is great looking offices tailored to people that supports a leading-edge building that can easily adapt to changing technology.
