

## Project Profile :

Enterprise Rent-A-Car relocated to a new corporate administrative building in August 2004. The office serves as an administrative, customer service, and training center. Environmental Interiors worked closely with Enterprise by specifying interior finishes and furniture options. Installation of all the furniture product, and move-management services were also provided. The result is a beautifully designed interior space highlighted by the new line of Moxie office furniture by Haworth Inc in the open-plan space. Other Haworth product lines were used in the reception area, private offices, and training rooms.
