Rhoads and Sinon

S. Market Square, Harrisburg

Project Profile :

Occupying 3 floors in a high rise building located in the heart of Harrisburg, Rhoads and Sinon is one of the largest regional law firms. Environmental Interiors worked in close liaison with a Philadelphia architectural firm to effect the relocation to the current offices. Private office standards were developed to eliminate the relocation of furniture. Use of space was maximised by six-high files fitted into architectural niches in the corridors as well as work stations with direct power infeeds to eliminate gaps against walls.
